

Incoming 1st Grade Summer Reading Log

Dear Parents,

Attached is a log for you and your child to keep track of their reading over the summer. We recommend 5 times per week for 10 minutes per day. For at least three books, have your child draw a picture of their favorite part of the story and write a sentence about it. Feel free to read even more and make copies of this log. Bring log and pictures to school the first week of school to turn in.

Below are math websites for your child to use over the summer. We recommend about 5 to 10 minutes a day, 5 times a week. Focus on telling time, money and values, and addition and subtraction facts. If you do not have computer access, any exercises using number, shapes, patterns, etc. would be great.
